Critical review of amorphous and microcrystalline silicon materials and solar cells: Special issue in honor of Stanford R. Ovshinsky
Guest editors: Hellmut Fritzsche and Subhendu Guha

Guest editorial

H. Fritzsche and S. Guha
Critical review of amorphous and microcrystalline silicon materials and solar cells: Special issue in honor of Stanford R. Ovshinsky 1

Special papers
Plasma chemistry and growth mechanism

A. Matsuda, M. Takai, T. Nishimoto and M. Kondo
Control of plasma chemistry for preparing highly stabilized amorphous silicon at high growth rate 3

A. Gallagher, G. Bano and K. Rozsa
Particles in silicon deposition discharges 27

Microstructure

D.L. Williamson
Microstructure of amorphous and microcrystalline Si and SiGe alloys using X-rays and neutrons 41

P.M. Voyles and J.R. Abelson
Medium-range order in amorphous silicon measured by fluctuation electron microscopy 85

D.V. Tsu, B.S. Chao and S.J. Jones
Intermediate order in tetrahedrally coordinated silicon: evidence for chainlike objects 115

R.W. Collins, A.S. Ferlauto, G.M. Ferreira, C. Chen, J. Koh, R.J. Koval, Y. Lee, J.M. Pearce and C.R. Wronski
Evolution of microstructure and phase in amorphous, protocrystalline, and microcrystalline silicon studied by real time spectroscopic ellipsometry 143

D. Han and K. Wang
Photo- and electro-luminescence of a-Si:H and mixed-phase alloys 181

Elsevier Science B.V.

W. Beyer
Diffusion and evolution of hydrogen in hydrogenated amorphous and microcrystalline silicon 235

T. Su and P.C. Taylor
Magnetic resonance measurements in hydrogenated amorphous silicon 269

Growth methods and properties

A.H. Mahan
Hot wire chemical vapor deposition of Si containing materials for solar cells 299

S. Guha, J. Yang, A. Banerjee, B. Yan and K. Lord
High quality amorphous silicon materials and cells grown with hydrogen dilution 329

Metastability—experimental

P. Stradins
Light-induced degradation in a-Si:H and its relation to defect creation 349

P. Tzanetakis
Metastable volume changes of hydrogenated amorphous silicon and silicon–germanium alloys produced by exposure to light 369

A. Yelon, A. Rochefort, S. Sheng and E. Sacher
Irradiation-induced structural changes in hydrogenated amorphous silicon as measured by X-ray photoemission spectroscopy 391

J. David Cohen
Light-induced defects in hydrogenated amorphous silicon germanium alloys 399

Metastability—models

H.M. Branz
The hydrogen collision model of metastability after 5 years: experimental tests and theoretical extensions 425

R. Biswas and B.C. Pan
Mechanisms of metastability in hydrogenated amorphous silicon 447

Microcrystalline materials

A.V. Shah, J. Meier, E. Vallat-Sauvain, N. Wyrsch, U. Kroll, C. Droz and U. Graf
Material and solar cell research in microcrystalline silicon 469

J. Kočka, A. Fejfar, H. Stuchlíková, J. Stuchlík, P. Fojtík, T. Mates, B. Rezek, K. Luterová, V. Švrček and I. Pelant
Basic features of transport in microcrystalline silicon 493

K. Lips, P. Kanschat and W. Fuhs
Defects and recombination in microcrystalline silicon 513

M. Kondo
Microcrystalline materials and cells deposited by RF glow discharge 543

Solar cells

E.A. Schiff
Low-mobility solar cells: a device physics primer with application to amorphous silicon 567

J. Yang, A. Banerjee and S. Guha
Amorphous silicon based photovoltaics—from earth to the "final frontier" 597

Manufacturing

M. Izu and T. Ellison
Roll-to-roll manufacturing of amorphous silicon alloy solar cells with in situ cell performance diagnostics 613

D.E. Carlson
Monolithic amorphous silicon alloy solar modules 627

Y. Tawada, H. Yamagishi and K. Yamamoto
Mass productions of thin film silicon PV modules 647
